The Museum of Enigmatic Objects . . .	99
The Tea Picker	117

The Island of White Pearls

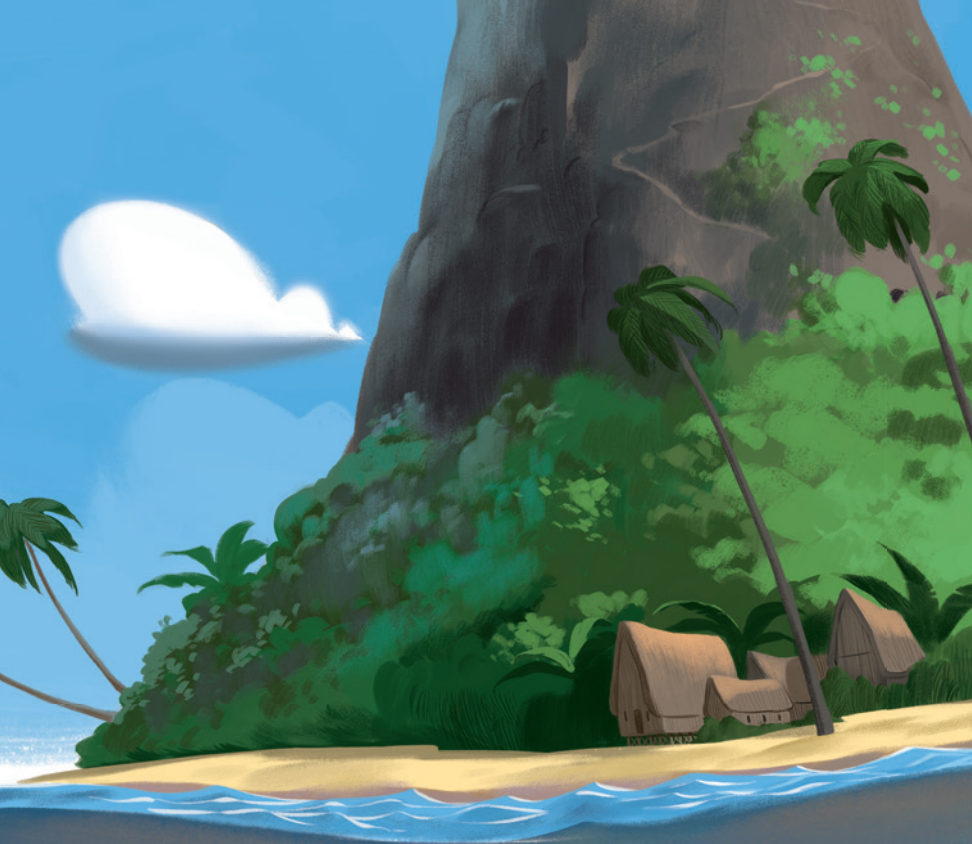

he Island of White Pearls was so far from the nearest mainland that it was considered almost lost in the ocean.

In the very center of the tiny landmass was an extinct cone-shaped volcano.

A small community of people lived on the island. They lived as a family, which is not at all strange if you know that they truly were one family. They went by different first names, but their last name was Libeseribi, who knows since when and why exactly like that.

The youngest among them was a little girl Tomka, just old enough to dive on her own and collect pearls from shells. After all, that's what everyone else was doing.

Once a year they traded pearls at the Floating Market on the only day when this large trade and barter vessel cruised near their island.

The Libeseribi family lived in peace, joy and harmony on their paradise island.
